

We are so excited to host our upcoming Cybersecurity Workshop, March 8 2018 here at LGAAR. During this event, speaker Josh Rosen will be going over a few key points for best practices against cyber attacks.

1. Recognizing different types of cyber attacks and how to avoid them
2. Tips on protecting your data
3. Fundamentals of network security
4. Protecting the weakest link - the end user
5. how to recover after an attack

## What is Cybercrime? How does it affect me?

Criminal activity involving the internet, a computer system or computer technology.
